Professional Summary

Full Stack Software Engineer with hands-on experience building scalable MERN applications and AI-powered platforms. Skilled in React.js, Node.js, Express.js, FastAPI, MongoDB, and Supabase, with a strong foundation in real-time systems, authentication, and applied machine learning. Passionate about shipping production-ready software and integrating AI into real-world tools.

Education

Pandit Deendayal Energy University (PDEU), Gandhinagar, Gujarat

Bachelor of Technology in Computer Engineering

2023 – 2027

CGPA: 9.53 / 10.0

Technical Skills

Languages: C++, Python, JavaScript, SQL

Frontend: React.js, Bootstrap CSS, HTML5

Backend: Node.js, Express.js, FastAPI **Databases:** MongoDB Atlas, Supabase

AI / ML: OpenCV, Prompt Engineering, Pandas, NumPy, Matplotlib, Seaborn

Tools & Technologies: Git, GitHub, Vercel, Netlify, Redis, Postman

Experience

MERN Stack Intern

May 2026 – June 2026

BrainyBeam Info-Tech Pvt. Ltd.

Ahmedabad, Gujarat (Remote)

- Completed a 6-week remote internship building responsive web applications using MongoDB, Express.js, React.js, and Node.js.
- Worked directly from feature requirements to functioning UI, sharpening the ability to translate a spec into a working product and flag gaps or edge cases early.

Technical Projects

ThreatLens AI – Cyber Threat Intelligence Platform — [GitHub](#) — [Live](#)

July 2026

React.js, FastAPI, Python, Machine Learning, OpenCV, Prompt Engineering, Supabase

- Architected a multi-modal threat analysis pipeline (OCR → Computer Vision → LLM synthesis) to classify URLs, emails, and QR codes as phishing or safe with human-readable explanations.
- Built an explainable reporting layer that transforms raw model confidence scores into structured, plain-language threat breakdowns, enabling non-technical users to quickly triage suspicious messages.
- Implemented a scalable FastAPI backend with Supabase for secure data persistence and REST API integration, and developed interactive React dashboards for real-time threat visualization.

CampusConnect — [GitHub](#) — [Live](#)

June – July 2026

React.js, Node.js, Express.js, MongoDB, JWT Authentication, REST API Development

- Designed three role-based dashboards for students, faculty, and admins, surfacing each persona's most-used action by default (attendance for students, event management for faculty) instead of a single generic interface.
- Implemented JWT authentication and role-based access control across the platform, backed by a REST API architecture shaped around real usage patterns.
- Built QR-based attendance tracking and an interactive campus map using Leaflet and OpenStreetMap.

ClipHub – Universal Clipboard & File Transfer — [GitHub](#) — [Live](#)

March – April 2026

React.js, Node.js, Express.js, Redis, WebSockets, REST API Development

- Built a real-time clipboard and file-sync tool using WebSockets and Redis, enabling instant text and file transfer across devices without manual steps.
- Iterated on the core sync loop with drag-and-drop uploads and QR-based sharing, then added password protection and auto-expiry to strengthen trust for personal content.
- Extended sharing beyond public links with user-to-user targeted sharing, client-side encryption, and self-destructing content for stronger privacy guarantees.

Coding Profiles

LeetCode: leetcode.com/YugPatel0108

HackerRank: hackerrank.com/profile/yjpatel1275

Achievements & Certifications

- Awarded NPTEL Gold Certificate in Human Computer Interaction
- Recipient of Merit-cum-Means Scholarship for academic excellence (awarded every semester)
- Completed The Complete Full Stack Web Development Bootcamp – Udemy
- 5-star rating in C++ on HackerRank
